

# Traffic Maze #1

In an attempt to improve the crazy flow of traffic in the town of Fort Collins, the newly appointed traffic commissioner made new one way streets and restrictions on turns (in the map below). Can you find a way to navigate the streets of Fort Collins from Start to Finish? You must enter at the START and go through the town and go out where it says FINISH.

At each intersection you must follow one of the arrows. That is, you may turn in a given direction only when there is a curved line in that direction, and you may go straight only when there is a straight line to follow. No U turns! No backing up! You may leave an intersection only at the head of an arrow.
