WACKY WORDIES

IN LIVING COLOR!

oil

turn ny

JOHN

The object is to discover the familiar phrase, name, or title represented by each arrangement of letters and symbols, each of which contains the name of at least one color (including such "noncolors" as black). Keep an eye out for homophones. If you don't get through all 26 with flying colors, don't get into a **FUNK**—you can't expect your little CELLS to function perfectly all the time!
