

## Equations Analysis Test

By David Pleacher in *The JCTM Newsletter* March 23, 1988

Each equation below contains the initials of words that are needed to complete it.

Find the missing words. All of the equations are mathematical (and some involve trigonometry).

For example, 36 = I. in a Y. would be 36 = Inches in a Yard.

- |                             |                      |   |                                     |
|-----------------------------|----------------------|---|-------------------------------------|
| 1. _____                    | 0                    | = | the T. of P. R.                     |
| 2. _____                    | 0                    | = | the I. E. for A.                    |
| 3. _____                    | $\frac{\sqrt{2}}{2}$ | = | the C. of F.-F. D.                  |
| 4. _____                    | 1                    | = | the S. of N. D.                     |
| 5. _____                    | 1                    | = | the I. E. for M.                    |
| 6. _____                    | $\sqrt{2}$           | = | the H. of an I. R.T. whose L. E. O. |
| 7. _____                    | 2                    | = | the C. of T. D.                     |
| 8. _____                    | 5                    | = | the D. in a P.                      |
| 9. _____                    | 9                    | = | the S. of a N.                      |
| 10. _____                   | 10                   | = | M. in a C.                          |
| 11. _____                   | 12                   | = | V. in a D.                          |
| 12. <u>Inches in a Yard</u> | 36                   | = | I. in a Y.                          |
| 13. _____                   | 45                   | = | A. of I. of a L. with S. E. to O.   |
| 14. _____                   | 49                   | = | the S. of S.                        |
| 15. _____                   | 60                   | = | D. in E. A. of an E. T.             |
| 16. _____                   | 90                   | = | S. of the A. A. of a R. T.          |
| 17. _____                   | 90                   | = | D. in a R. A.                       |
| 18. _____                   | 100                  | = | D. C. at which W. B.                |
| 19. _____                   | 120                  | = | D. in E. I. A. of a R. H.           |
| 20. _____                   | 360                  | = | D. in a C.                          |
| 21. _____                   | 640                  | = | A. in a S. M.                       |
